

R & R Hydro Solutions Working to Brighten Your Outside Home Appearance

By: Mary Grande

With the warmer weather of spring, many homeowners begin focus once again on the outside area of their property – planting flowers, laying new mulch and cutting the lawn, sure. But an often overlooked way to brighten your home's appearance and appeal is power washing. R & R Hydro Solutions, LLC of Branford offers professional power washing as well as other exterior services including gutter cleaning and repair all at reasonable rates. Owned and operated by

1995 Branford High School graduate Steve Malarney with his wife Priscilla Perdomo-Malarney, R & R Hydro Solutions provides power washing during the Spring, Summer, and Fall seasons, and in the winter months offers interior home improvement services.

Why is power washing important? Steve says "Power washing provides a thorough, deep cleaning that's more than about your house looking clean though. Yearly power washing can prevent unseeable damage to the structure of your home or business."

Power washing will remove the potentially damaging airborne dirt, mud, moss, algae and other surface residues from outside sources. Moss buildup on a house or roof is not only unsightly, but can actually grow into the shingles causing unseen destruction to the integrity of your roof. A little preventative maintenance can go a long way towards enhancing your property's value and more importantly extending the life of your roof and avoiding costly repairs.

R & R Hydro Solutions power wash before and after

Using a soft wash of soap and water, R & R Hydro Solutions can and will clean all types of housing structures and surfaces: roofs, concrete, front steps and walkways as well as windows.

While Steve prefers to go out to look at the home or business to provide a free estimate, as a customer convenience a homeowner can fill out the form on their website www.rrhydrosolutions.com to obtain a rough cost estimate. Power washing a typical 2500 square foot Colonial usually takes 2 ½ -3 hours. For clients with well water, R & R Hydro Solutions has a 100-gallon water tank truck.

Mainly serving the shoreline, R & R Hydro Solutions is fully licensed and insured and provides services up and through the Middletown area. Steve values his client's time. You can be assured when he says he'll be there at 9 am he'll be there on time. "I cannot overstate how important it is to me to provide a professional and well-done job to the client who has hired me," says Steve.

Steve and his wife Priscilla, an Ecuadorian native, opened R & R Hydro Solutions after relocating back to Short Beach after spending 16 years in Valdez, Alaska. This June the business will celebrate its first anniversary. Their two girls - Rowen age 7 and Rio age 5 - attend Sliney Elementary School. Says Priscilla, "Moving here from such a small town in Alaska was different but the openness and kindness of the Branford Community in welcoming our new business has been so gratifying. I think word of mouth about Steve's reliability, honesty and professionalism has helped to make our business so successful."
